Brief about the idea:

This project is not just about building another tool, it's about creating a space that encourages creativity, collaboration, and continuous learning within the organisation. By integrating various Google services and other productivity tools, this digital notice board extension aims to centralise information flow, making it easier for employees to stay updated and engaged. Whether it's sharing company-wide announcements, tracking daily goals, or discovering new learning resources, the platform serves as a comprehensive hub for all things work-related.

Widgets that we built:

- Chatgpt
- Google Calendar
- Google Meet
- Google Spreadsheet
- Google Form
- **Google Slides**
- Google Keep
- Notes
- Notion
- Opportunity Board
- **Pomodoro Timer**
- Book Quote
- Daily Goal
- Issue Tracker
- Music
- TIL Corner
- Steps Tracker
- Announcements
- Poll

How this extension will solve the problem:

The integration of **ChatGPT** and **Google Calendar** facilitates seamless scheduling and intelligent assistance, streamlining administrative tasks and improving accessibility to important dates and events. **Google Meet** and **Notes** ensure that remote meetings and note-taking are integrated directly into the workflow, promoting easy access and participation. **Notion** integration offers a versatile workspace for project management and knowledge sharing, enhancing team collaboration and organisational efficiency.

Features like the **Opportunity Board**, **Poll**, and **Google Slides** empower employees to contribute ideas, vote on decisions, and share presentations, democratising communication and fostering a culture of inclusivity. The **Pomodoro Timer**, **Google Spreadsheet**, and **Google Form** support structured work habits, data management, and feedback collection, essential for monitoring progress and adapting strategies.

Personal development and well-being are not overlooked, with **Book Quote**, **Daily Goal**, **Issue Tracker**, **Music**, **TIL** (Today I Learned), **Steps Tracker**, and **Google Keep** catering to individual growth, health tracking, continuous learning, and personal organisation. These features recognize the importance of employee well-being and development in sustaining long-term productivity and satisfaction.

Finally, **Announcements** ensure critical information is prominently displayed, keeping everyone informed and aligned with organisational goals. Each feature, from productivity tools to engagement platforms, contributes to creating an environment where employees feel connected, informed, and empowered to contribute their best work.
